

Action plan submitted by EMEL ÖZCAN for ADNAN MENDERES ANADOLU LİSESİ - 06.02.2023 @ 20:14:03

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › The fact that staff and pupils are allowed to use USB memory sticks in your school following permission, would require that all staff concerned receive adequate training to be able to know when they can be used safely. Is this the case? To keep your systems secure whilst allowing staff and pupils you also need to include the ground rules in your Acceptable Use Policy. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.

Data protection

- › It is good that your email system is protected and that you have a policy for the transfer of pupil data in place. In this regard, it is important to draw up guidelines so that all staff are clear about what to do if they discover inappropriate or illegal content on school machines. For further information see the fact sheet on Protecting

sensitive data (www.esafetylabel.eu/group/community/protecting-sensitive-data-in-schools).

- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.

Software licensing

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › It is good practise that your are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.
- › Once a year decisions on new hard/software are made. Investigate ways to also allow for new hard/software requests throughout the year. It will allow teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

Policy

Acceptable Use Policy (AUP)

- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylabel.eu/group/community/school-policy) will provide helpful information.
- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

Staff policy

- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.
- › It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).

Pupil practice/behaviour

- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetymodel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetymodel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

Practice

Management of eSafety

- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetymodel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum.
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › Although these are sensitive issues, it is good to be proactive about raising awareness of them. Consider integrating some education around these issues into the overall eSafety curriculum.
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).

Extra curricular activities

- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.
- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.

Sources of support Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?
- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetylabel.eu/group/community/suggestions-for-online-training-courses.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the

Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
